

— CAPABILITY STATEMENT 2026

Powering Namibia's next **industrial** **frontier.**

Integrated industrial services for energy, mining, and oil and gas.

WHO WE ARE

Namibian ownership. Industrial ambition.

Established in 2017, CGP Energy is a Namibian industrial services company connecting international capability with accountable local execution. We support projects from definition and sourcing through field delivery, commissioning and lifecycle support.

2017

ESTABLISHED

100%

NAMIBIAN OWNED

3

GROWTH SECTORS

01

Energy

Power, renewable energy, utilities and industrial energy infrastructure.

02

Mining

Plant support, equipment supply, maintenance, shutdowns and industrial services.

03

Oil and Gas

Local content, procurement, logistics and technical support for an emerging offshore economy.

OUR DELIVERY MODEL

Five connected disciplines. One accountable route.

01

Advise and design

Studies, project definition, specifications, design coordination and technical support.

02

Procure and supply

Local and global sourcing, evaluation, expediting, inspection, transport and after sales support.

03

Execute and construct

Infrastructure, electrical and mechanical works, assembly, field engineering and commissioning support.

04

Assist and supervise

Project, cost, risk, contract, document, HSE and site delivery control.

05

Inspect and maintain

Quality assurance, inspection, NDT coordination, asset integrity, shutdown and maintenance support.

01

Define

Scope and risk

02

Mobilise

People and supply

03

Deliver

Control and evidence

04

Close

Handover and lifecycle

INDUSTRIAL SUPPLY AND PARTNERSHIPS

Critical equipment. Local delivery. Long term value.

CGP coordinates technical review, supplier sourcing, expediting, inspection, logistics and site delivery across essential industrial categories.

Piping and structural steel

Valves, fittings and flow equipment

Pumps and compressors

Electrical and ATEX equipment

Instrumentation and control

Firefighting and PPE

Mining and material handling

Power and renewable systems

Entering Namibia?

CGP works with international manufacturers, engineering firms and service companies that value credible local participation and disciplined delivery.

- Market and opportunity alignment
- Local vendor development
- Representation and delivery integration
- Skills and knowledge transfer
